Township of Cramahe

Burnham Street, Park Street and Cedar Street
Roadway Reconstruction

Construction Details

Please be advised that beginning the week of July 3, 2017 reconstruction of the above streets will commence and be ongoing for approximately twelve (12) months. During this period, the roads will temporarily be closed to through traffic; however, every effort will be made to ensure residents retain access to their properties. The Contractor may be on site prior to this date to place signage and install temporary water supply to homes affected by construction but will not commence work prior to July 3, 2017.

Access to properties for both vehicular and pedestrian traffic will be maintained at all times, with the exception of very short duration periods. Signage will be installed to provide details on traffic access. Although construction will be disruptive at times, we ask for your patience to complete this work. Heavy equipment will generate noise and vibration at times. Since there is often a perception from residents that vibration may cause damage, such as cracks in wall plaster, a professional company will pre-assess houses in the vicinity of the construction. OZA Inspections Ltd. will carry out pre-condition inspections using trained staff. We understand privacy concerns but encourage you to allow the inspections since any subsequent claims will require pre-condition assessment information for a fair comparison. A representative will be contacting you shortly to explain the process and obtain your permission. There is no cost to you for this inspection.

The Contractor will ensure that garbage and recyclables pick-up is uninterrupted by construction activity. The Contractor will also ensure that Canada Post employees have daily access to properties for mail delivery services.
